

Service Manual

Stereo Integrated Amplifier

Amplifier

SU-A900MK2

Colour

(K) Black Type

Areas

Suffix for Model No.	Area	Colour
(E)	Europe	(K)
(EB)	Great Britain	
(EG)	Germany and Italy	
(GC)	Asia, Latin America, Middle Near East and Africa	
(GN)	Oceania	

Specifications (DIN 45 500)

20 Hz – 20 kHz continuous power output both channels driven	2 × 90 W (8 Ω)
1 kHz continuous power output both channels driven (THD: 1%)	2 × 100 W (8 Ω) 2 × 140 W (4 Ω)
63 Hz – 12.5 kHz continuous power output both channels driven (THD: 0.7%)	2 × 90 W (8 Ω) 2 × 125 W (4 Ω)
Total harmonic distortion rated power at 20 Hz – 20 kHz	0.01% (8 Ω)
Intermodulation distortion (50 Hz: 7 kHz = 4:1, SMPTE) rated power	0.007% (8 Ω)
Residual hum and noise	1 mV
Damping factor	60 (8 Ω) 30 (4 Ω)
Headphones output level/impedance	540 mV/330 Ω
Load impedance	
A or B	4 – 16 Ω
A and B	8 – 16 Ω
Input sensitivity/impedance	
PHONO MM	2.5 mV/47 kΩ
PHONO MC	170 μV/220 Ω
TUNER, CD, AUX, TAPE 1, TAPE 2/DCC	150 mV/22 kΩ
Phono maximum input voltage (1 kHz, RMS)	
MM	160 mV (IHF '66)
MC	12 mV (IHF '66)
S/N (rated power, 4Ω)	
PHONO MM	78 dB (85 dB, IHF '66)
PHONO MC	64 dB (S = 250 μV, 66 dB, IHF '66)
TUNER, CD, AUX, TAPE 1, TAPE 2/DCC	91 dB (100 dB, IHF '66)
S/N at – 26 dB power (4 Ω)	
PHONO MM	68 dB
PHONO MC	63 dB
TUNER, CD, AUX, TAPE 1, TAPE 2/DCC	70 dB

S/N at 50 mW power (4 Ω)

PHONO MM 64 dB

TUNER, CD, AUX, TAPE 1, TAPE 2/DCC 64 dB

Frequency response

PHONO MM RIAA standard curve ±0.8 dB
(30 Hz – 15 kHz)

TUNER, CD, AUX, TAPE 1, TAPE 2/DCC

3 Hz – 80 kHz (+0, –3 dB)
+0 dB, –0.3 dB (20 Hz – 20 kHz)

Tone controls

BASS 50 Hz, +10 to –10 dB

TREBLE 20 kHz, +10 to –10 dB

Output voltage

TAPE 1, TAPE 2/DCC REC OUT 150 mV

Channel balance (AUX 250 Hz – 6.3 kHz)

±1 dB

Channel separation (AUX 1 kHz)

50 dB

GENERAL

Power consumption 315 W

Power supply

For (E) and (EG) areas 50 Hz/60 Hz AC, 230 V

For (EB) and (GN) areas 50 Hz/60 Hz AC, 230 V – 240 V

For (GC) area only 50 Hz/60 Hz AC, 110 V – 127 V / 220 V – 240V

Dimensions (W × H × D)

430 × 136 × 365 mm

Weight

9.4 kg

Notes:

- Specifications are subject to change without notice.
Weight and dimensions are approximate.
- Total harmonic distortion is measured by the digital spectrum analyzer.
- For areas except Europe
The specification values given have been measured while using a 240 V power supply.

For (EB) area only

This apparatus was produced to BS 800.

Technics

• Operation Check and Main Component Replacement Procedures	10~13		

Before Repair

- (1) Turn off the power supply. Using a 10 Ω , 10 W resistor, connect both ends of power supply capacitors (C701, C702) in order to discharge the voltage.
 (2) Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50/60 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 110 V/127 V/220 V/240 V.

Power supply voltage	AC 230 V	AC 240 V	AC 110~127 V	AC 220~240 V
Consumed current 50Hz	70~270 mA	60~260 mA	120~500 mA	60~260 mA

Protection circuitry

The protection circuitry may have operated if either of the following conditions is noticed:

- * No sound is heard when the power is switched ON.
- * Sound stops during a performance.

The functions of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON again.

For areas except (E) (EB) (EG) (GN) —

CAUTION:

The AC voltage differs according to the area.

Be sure to set the proper voltage in your area before use.

Accessories

- AC power supply cord 1

for (E), (EG) and (GC) areas : (RJA0019-2K)

for (EB) area : (VJA0733)

for (GN) area : (RJA0036-K)

- Remote control transmitter
(RAK-SU129WH) 1

- Batteries
(UM-4, "AAA", R03) 2
- Note:** These are available on sales route.

- Power plug adaptor
(SJP5213-2) 1
- for (GC) area only

■ Caution for AC Mains Lead (For United Kingdom)

("EB" area code model only)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362. Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral

Brown: Live

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

Under no circumstances should either of these wires be connected to the earth terminal of the three pin plug, marked with the letter E or the Earth Symbol .

Before use

Remove the connector cover as follows.

How to replace the fuse

1. Remove the fuse cover with a screwdriver.

2. Replace the fuse and attach the fuse cover.

■ Front Panel Controls

No.	Name
①	Power "STANDBY  ON" switch (POWER, STANDBY  ON) Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.
②	"STANDBY" indicator (STANDBY) When the unit is connected to the AC mains supply, this indicator lights up in standby mode and goes out when the unit is turned on.
③	Operation indicator (OPERATION) When the power is switched ON, this indicator illuminates after about 4 seconds when the unit is in the operating condition. If an abnormal condition in the circuitry is detected, such as DC voltage appearing in the output or a short-circuit of the positive (+) and negative (-) wires from the speaker terminals, the protection circuit functions and this indicator will not illuminate.
④	Tone control button (TONE)
⑤	Volume control (VOLUME)
⑥	Tape-monitor button/indicators (TAPE MONITOR)

No.	Name
⑦	Remote control signal receptor (SENSOR) Receives the signals from the remote control.
⑧	Headphones jack (PHONES)
⑨	Speaker select buttons/indicators (SPEAKERS)
⑩	Tone controls (BASS/TREBLE)
⑪	Balance control (BALANCE)
⑫	Input select buttons/indicators (INPUT SELECTOR)
⑬	Phono cartridge selector (PHONO SELECTOR)

■ Connections

To connect to each terminal

Make connections to each component in the system by using stereo connection cables (not included).

Stereo connection cable

White (L) 
Red (R) 

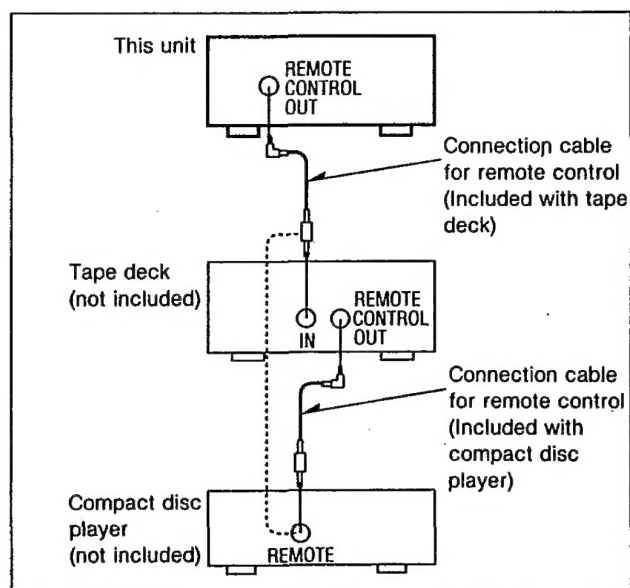

A "REMOTE CONTROL OUT" terminal

Connect the connection cable for the remote control to a Technics tape deck and/or CD player (or CD changer) which has the appropriate remote control terminal as shown at the right.

If a tape deck is not being used, the CD player (or CD changer) can be connected directly (dotted line).

Note

For a tape deck and/or CD player (or CD changer) with a remote control sensor, this connection is not necessary.

To connect the speakers

① Strip off the outer covering, and twist the center conductor.

② Turn completely to the left.

③ Insert the wire and turn completely to the right. Pull the cord to assure a proper connection.

Note Be sure to only connect positive (+) cords to positive (+) terminals, and negative (-) cords to negative (-) terminals.

Note

To prevent damage to circuitry, never short-circuit the positive (+) and negative (-) speaker wires.

■ "B" terminals

For connection to a second pair of speakers.

■ Speaker impedance

- When only the "A" or only the "B" terminals are used: 4–16 ohms
- When both the "A" and the "B" terminals are used simultaneously: 8–16 ohms

About the cooling fan

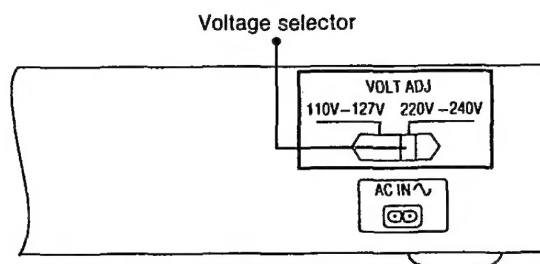

The cooling fan operates at high power output levels only.

To connect the AC power supply cord

FOR UNITED KINGDOM ONLY
BE SURE TO READ THE CAUTION FOR THE AC POWER SUPPLY CORD ON PAGE 3 BEFORE CONNECTING THE AC POWER SUPPLY CORD.

For areas except United Kingdom, Europe, Australia and N.Z.

Be sure to set the voltage selector to "110 V–127 V" or "220 V–240 V" according to the area in which the unit will be used. [Use a minus (-) screwdriver]

Note

Note that this unit will be seriously damaged if this setting is not made correctly.

Connect this cord after all other cables and cords are connected.

Note

The configuration of the AC power supply cord differs according to area.

(For areas except Australia and N.Z.)

Insertion of Connector

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing.

However there is no problem using the unit.

Not supplied for United Kingdom, Europe, Australia and N.Z.

If the power plug will not fit your socket, use the power plug adaptor (included).

■ Listening to Sound

Before operation, set VOLUME to the "MIN" position.

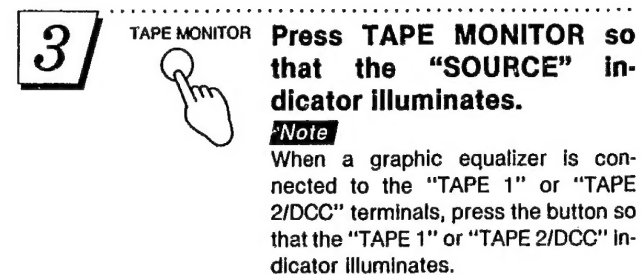

The corresponding indicator above will illuminate to indicate which speaker system is selected.

A: Sound can be heard from the speakers connected to the "A" terminals.

B: Sound can be heard from the speakers connected to the "B" terminals.

A and B: Sound can be heard simultaneously from the speakers connected to the "A" terminals and the "B" terminals.

off: No sound will be heard from the speakers. (Both indicators will turn off.)

Note
When a graphic equalizer is connected to the "TAPE 1" or "TAPE 2/DCC" terminals, press the button so that the "TAPE 1" or "TAPE 2/DCC" indicator illuminates.

- Each time the button is pressed, the illuminated position of the input select indicator will shift one position to the left.
- Each time the button is pressed, the illuminated position of the input select indicator will shift one position to the right.

To directly select the input source

The desired input source can be selected directly by using the input select buttons (A) located inside the panel.

TAPE 1: Set to this position to listen to equipment connected to the "TAPE 1" terminals.

TAPE 2/DCC: Set to this position to listen to equipment connected to the "TAPE 2/DCC" terminals.

AUX: Set to this position to listen to equipment connected to the "AUX" terminals.

CD: Set to this position to listen to compact discs.

TUNER: Set to this position to listen to radio broadcasts.

PHONO: Set to this position to listen to phono discs. Then, set the phono cartridge selector to the position which corresponds to the type of cartridge used on the turntable.

After listening is finished

Be sure to reduce the volume level, and switch the power to the standby condition by pressing POWER.

To adjust the tone quality

TONE
Set TONE to the "ON" position. If set to the "DEFEAT" position, tone controls have no effect.

BASS
Turn BASS to adjust the low-frequency sound.

TREBLE
Turn TREBLE to adjust the high-frequency sound.

To adjust the sound balance

BALANCE
Turn BALANCE to adjust the left/right sound balance.

When listening phono discs

PHONO SELECTOR
Select the cartridge type.

MM:
Set to this position when using a moving-magnet type cartridge or high-output moving-coil cartridge (1 mV or more).

MC:
Set to this position when using a moving-coil type cartridge.

When listening through headphones

Use VOLUME to reduce the volume level, and connect the headphones.

If sound from speakers is not wanted, press SPEAKERS (A) and/or (B) to turn off the speaker select indicators.

Note
Avoid listening for prolonged periods of time to prevent hearing damage.

■ Recording

To record from compact discs, etc.

It is possible to record from units which are connected to the rear "AUX", "CD", "TUNER" or "PHONO" terminals to cassette tape decks or DCC decks which are connected to the "TAPE 1" or "TAPE 2/DCC" terminals.

Before recording, prepare the tape deck or DCC for recording (recording level adjustment, etc.). See the tape deck's or DCC's operating instructions for details.

1 Press TAPE MONITOR so that the "SOURCE" indicator illuminates.

2 Select the program source to be recorded.

AUX: To record from equipment connected to the "AUX" terminals.
CD: To record from compact discs.
TUNER: To record from radio broadcasts.
PHONO: To record from phono discs.

3 Begin recording.
Follow your tape deck's or DCC's operating instructions.

4 Begin the source to be recorded.

■ To directly select the source for recording

The desired source can be selected directly by using the input select buttons (A B) located inside the panel.

■ To check the sound recorded while recording is being made

If a cassette tape deck with 3 heads is connected to the "TAPE 1" or "TAPE 2/DCC" terminals, it is possible to check the sound being recorded onto the tape.

Tape-to-tape recording

It is possible to record from tape deck 1 (the cassette tape deck which is connected to the "TAPE 1" terminals) to tape deck 2 (the cassette tape deck or DCC deck which is connected to the "TAPE 2/DCC" terminals) and vice versa.

Preparation

- Before recording, prepare the tape deck or DCC for recording (recording level adjustment, etc.). See the tape deck's or DCC's operating instructions for details.
- Load tapes which have been advanced to the end of the leader tape into both decks.

To record from tape deck 2 to 1

1 Press TAPE MONITOR so that the "SOURCE" indicator illuminates.

2 Press ◀ or ▶ to select "TAPE 2/DCC".

3 Begin tape deck 1 for recording and tape deck 2 for playback.

To record from tape deck 1 to 2

1 Press TAPE MONITOR so that the "SOURCE" indicator illuminates.

2 Press ◀ or ▶ to select "TAPE 1".

3 Begin tape deck 2 for recording and tape deck 1 for playback.

TAPE MONITOR

Press TAPE MONITOR to select the deck (tape deck 1 or 2) and set the monitor switch on the tape deck to "TAPE".

TAPE 1: when recording on tape deck 1
TAPE 2/DCC: when recording on tape deck 2

■ Operation Check and Main Component Replacement Procedures

NOTE

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
3. Select items from the following index when checks or replacement are required.
4. Illustrated screws are equivalent to actual size.
5. [] indicates parts No.

● Contents

	Page
1. Checking for the Volume P.C.B. /Operation P.C.B. /Tone AMP P.C.B.	11.
2. Checking for the Main P.C.B.	12.
3. Replacement for power IC.	13.

1. Common disassembly procedures (Follow this procedure prior to other disassembly.)

- 1, 2, 5, 6
[RHD30035-K1] (Black)
- 3, 4
[XTBS3+8JFZ1] (Black)

2. Checking for the Volume P.C.B. / Operation P.C.B. / Tone AMP P.C.B.

To check the operation of each P.C.B., use item 1 on page 10.

To remove each P.C.B.

Step 1
Remove the 3 screws.

Step 4 Remove the 3 knobs.

Step 2 Remove the knob and nut.

Step 3 Release the claw, and then remove the volume P.C.B.

Step 5 Remove the 14 screws.

3. Checking for the Main P.C.B.

Step 1 Follow the disassembly procedure described in item 1 on page 10.

Step 2 Remove the 3 screws.

Step 4
Remove the 8 screws.

Step 7 Install the rear panel temporarily on the main P.C.B. again.

※ (E, EG) : RGR0171A-EB
※ (EB) : RGR0171E-C1C
※ (GC) : RGR0171B-CC
※ (GN) : RGR0171A-F1C

Step 3 Remove the 15 screws and connector.

Step 5 Lift the main P.C.B. off the retention post on the bottom chassis.

Step 6 Remove the main P.C.B. in the direction of arrow ①, ②.

Step 8 Connect the front panel ass'y of the P.C.B. connectors to the main P.C.B. and set it as the illustration below.

4. Replacement for power IC.

Step 1 Follow the disassembly procedure described in item 1 on page 10.

Step 2 When remove the bottom cover, cut the joints (←) as shown below. (9 joints)

Step 4 Remove the 3 screws, and then remove the sub heat sink and angle.

Step 5 Remove the 4 screws and then remove the power IC's.

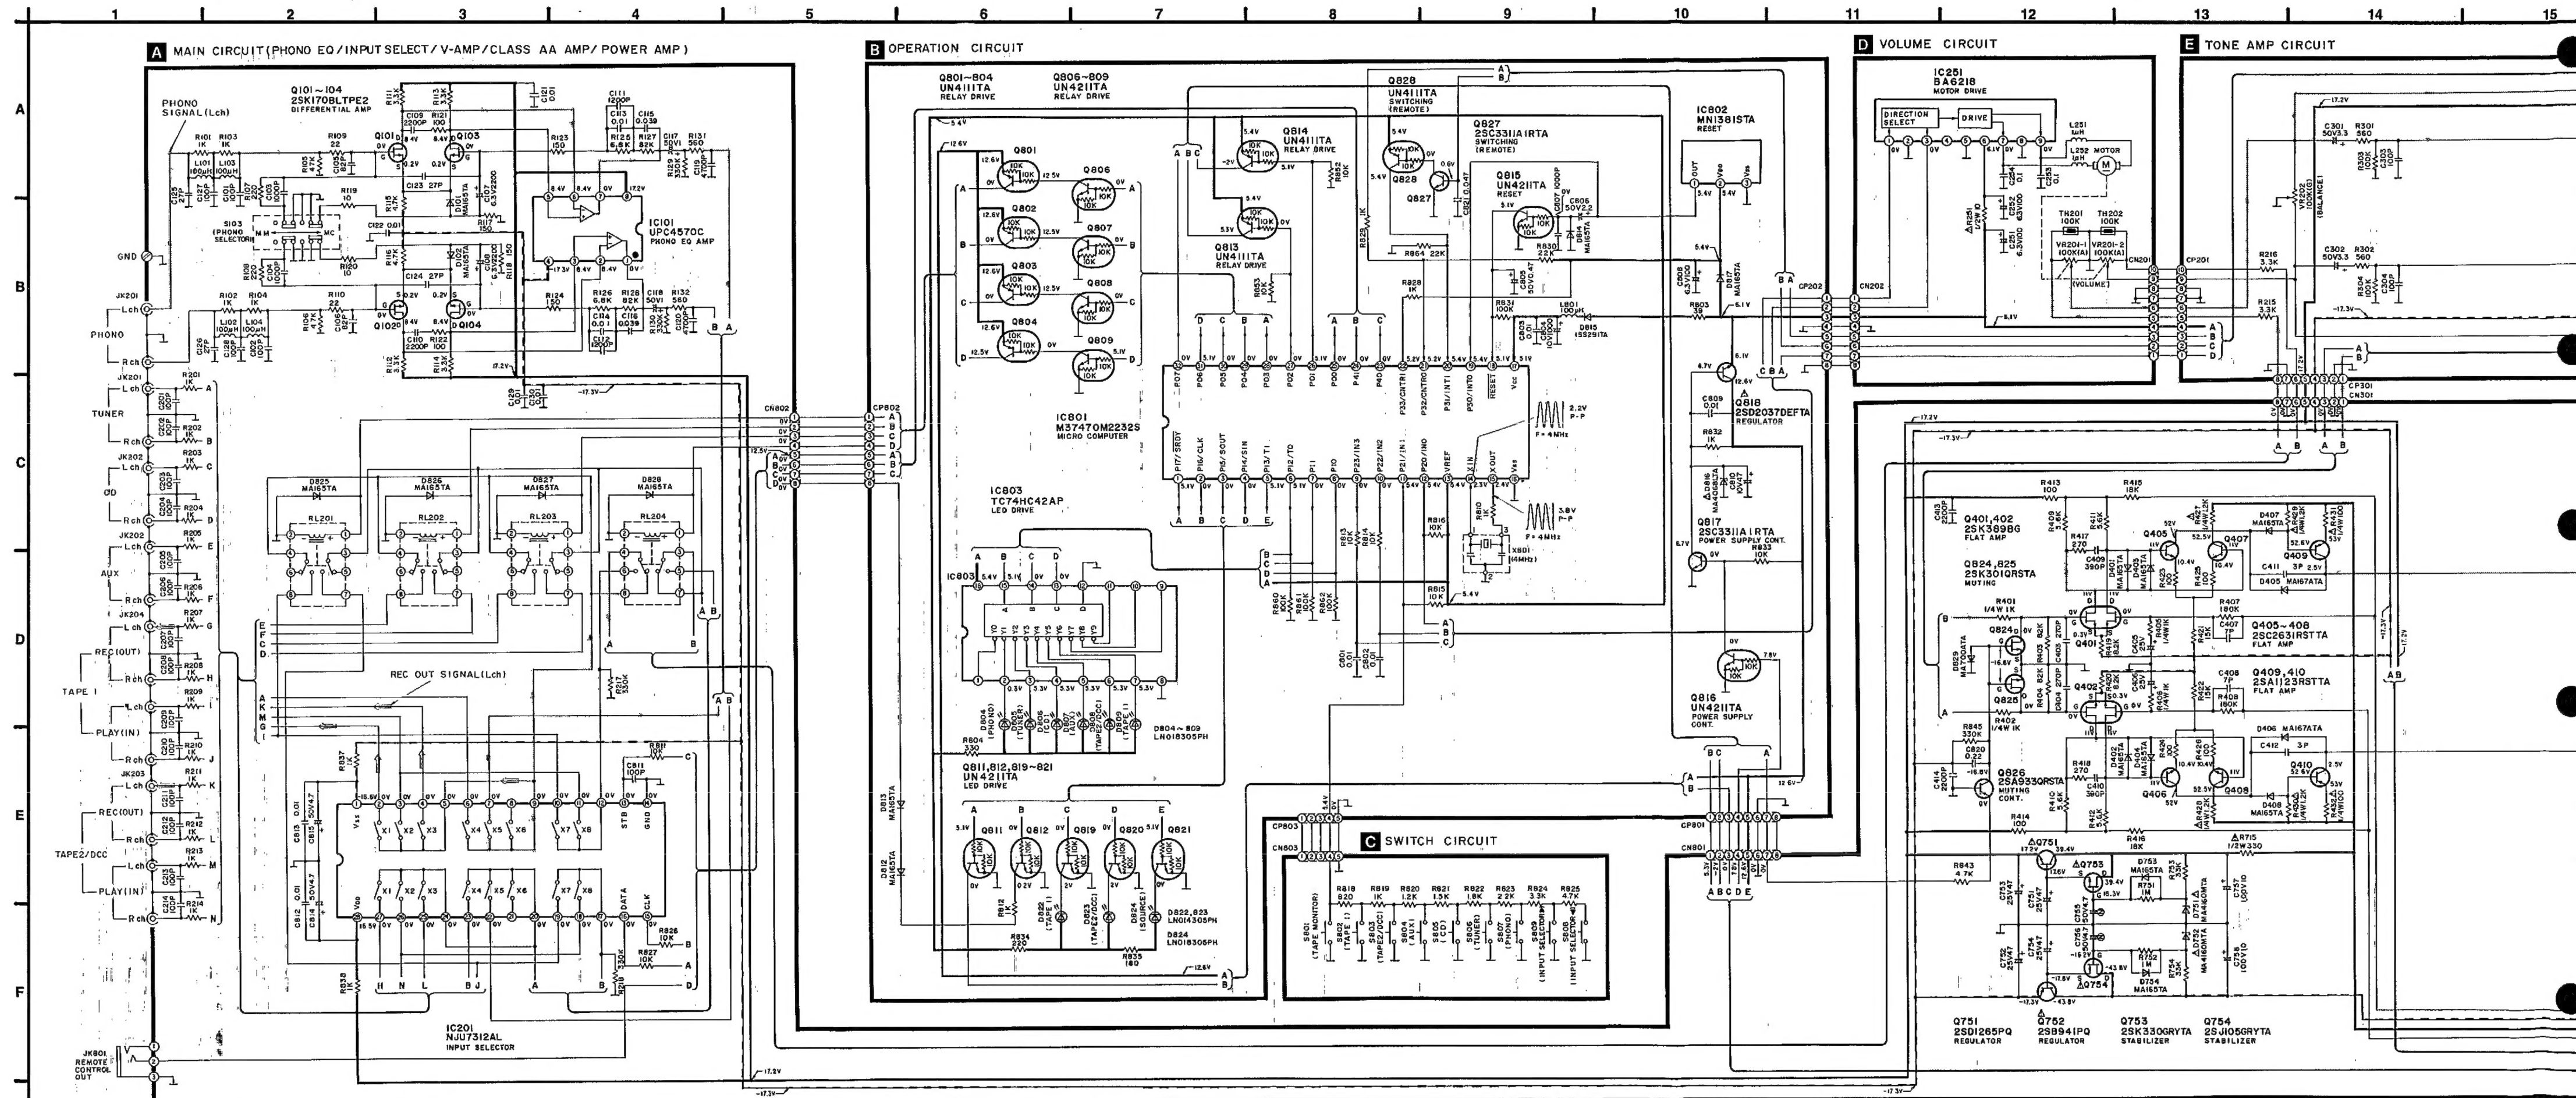

CAUTION

- After replacing the power IC, apply a sufficient quantity of compound grease (RFKX0002/SZZ0L15) between the heat sink and the power IC (Radiation of power IC).
- Tighten enough the screws (①~⑦) after replacing the power IC. Otherwise, the heat radiation works little.

Step 6 Fix the bottom cover with screw.

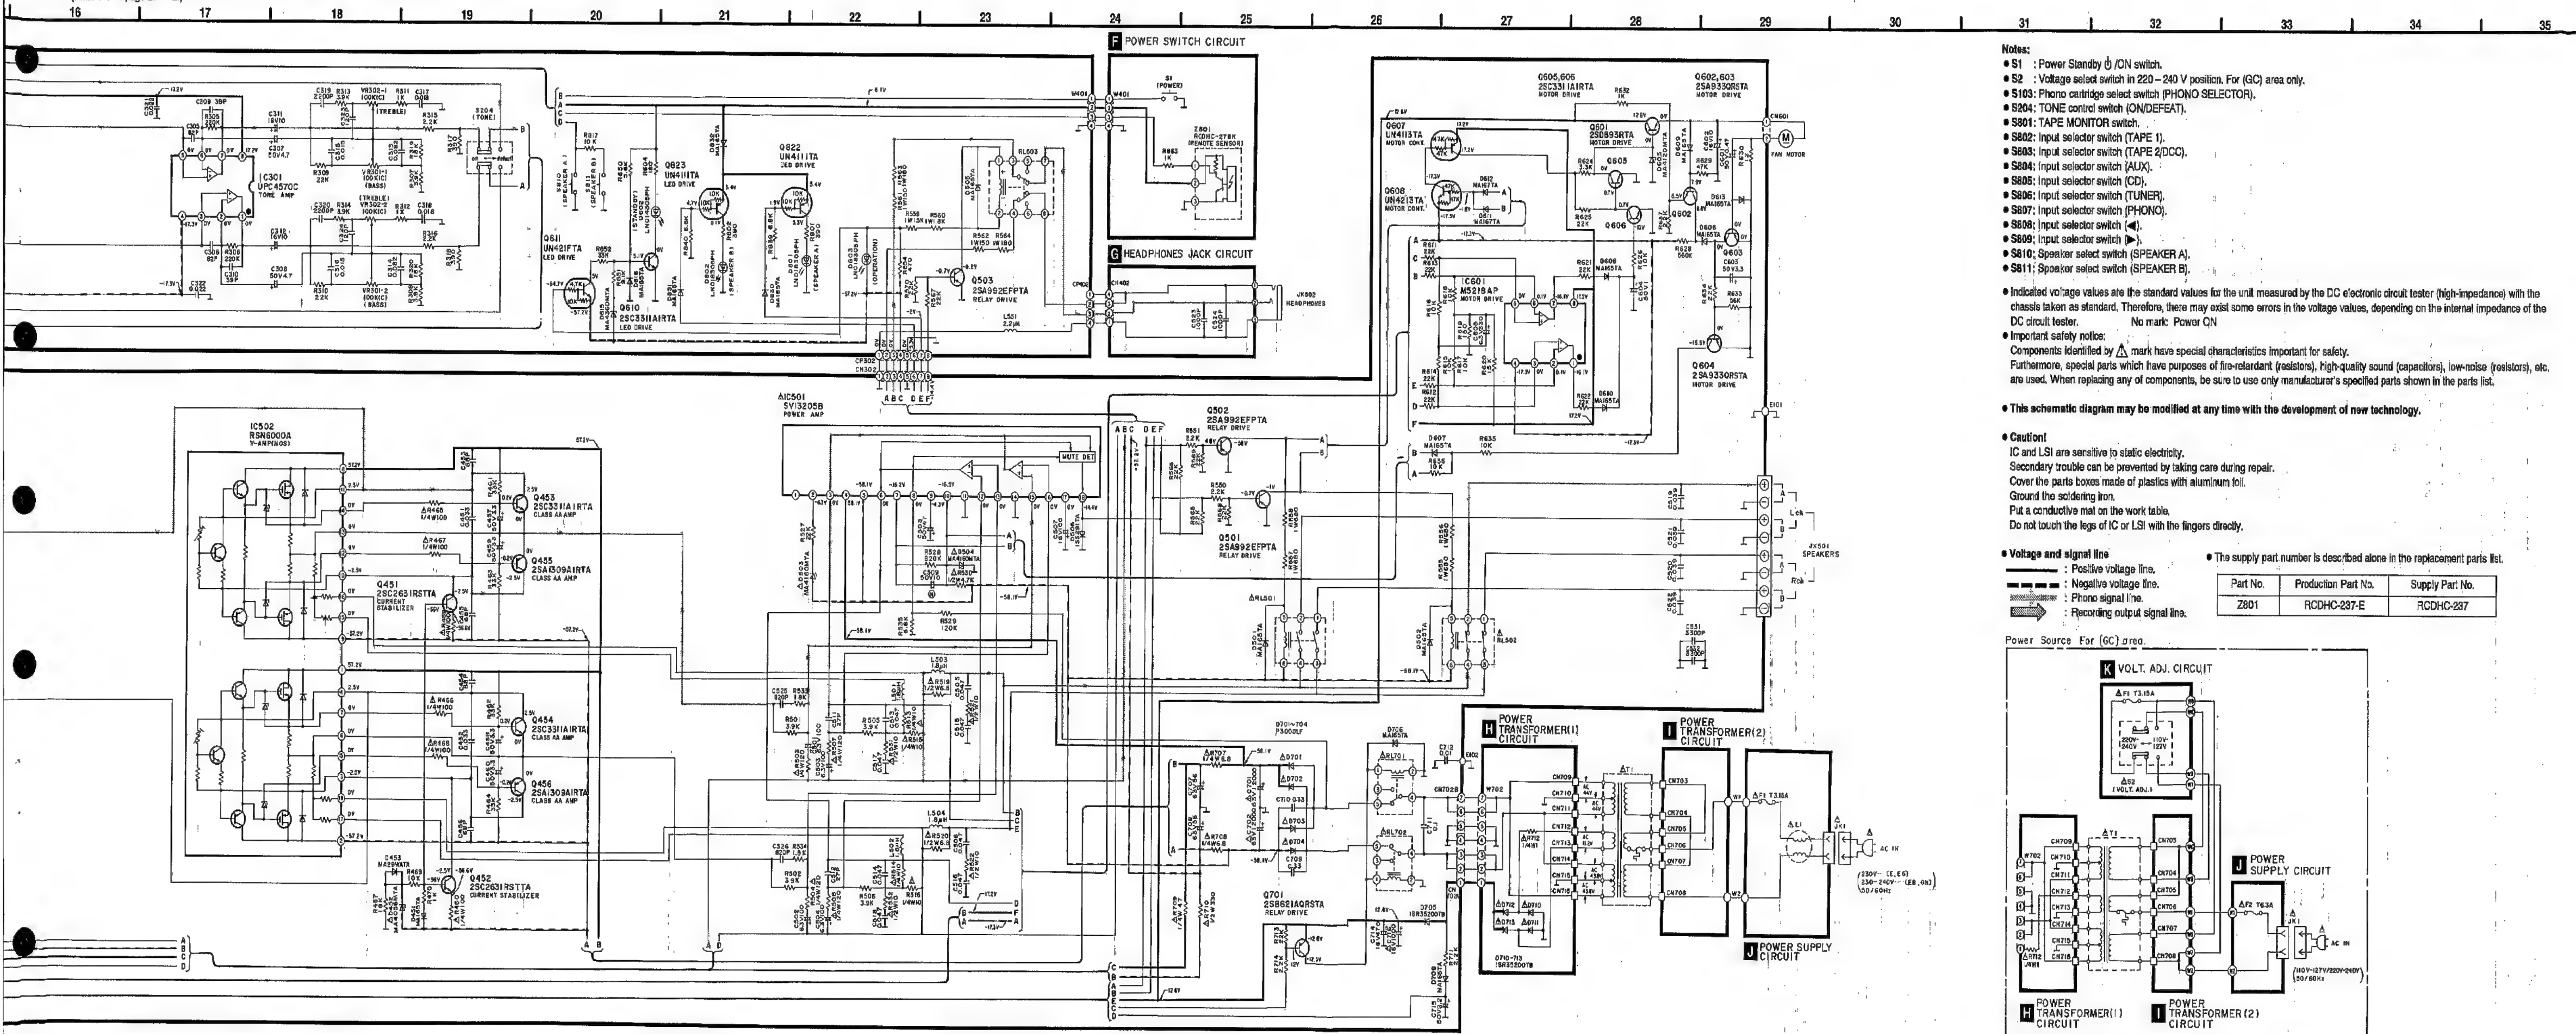

■ Schematic Diagram • Main/Operation/Switch/Volume/Tone Amp. Circuit (Parts list on page 29~32.)

● Power Switch/Headphones Jack/Power Transformer (1) (2)/Power Supply Circuit

(Parts list on page 29~32.)

Notes:

- S1 : Power Standby (ON) switch.
- S2 : Voltage select switch in 220 ~ 240 V position. For (GC) area only.
- S103: Phono cartridge select switch (PHONO SELECTOR).
- S204: TONE control switch (ON/DEFEAT).
- S801: TAPE MONITOR switch.
- S802: Input selector switch (TAPE 1).
- S803: Input selector switch (TAPE 2/DCC).
- S804: Input selector switch (AUX).
- S805: Input selector switch (CD).
- S806: Input selector switch (TUNER).
- S807: Input selector switch (PHONO).
- S808: Input selector switch (←).
- S809: Input selector switch (→).
- S810: Speaker select switch (SPEAKER A).
- S811: Speaker select switch (SPEAKER B).

● Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester. No mark: Power ON

● Important safety notice:

Components identified by Δ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

● This schematic diagram may be modified at any time with the development of new technology.

● Caution!

IC and LSI are sensitive to static electricity. Secondary trouble can be prevented by taking care during repair. Cover the parts boxes made of plastics with aluminum foil. Ground the soldering iron. Put a conductive mat on the work table. Do not touch the legs of IC or LSI with the fingers directly.

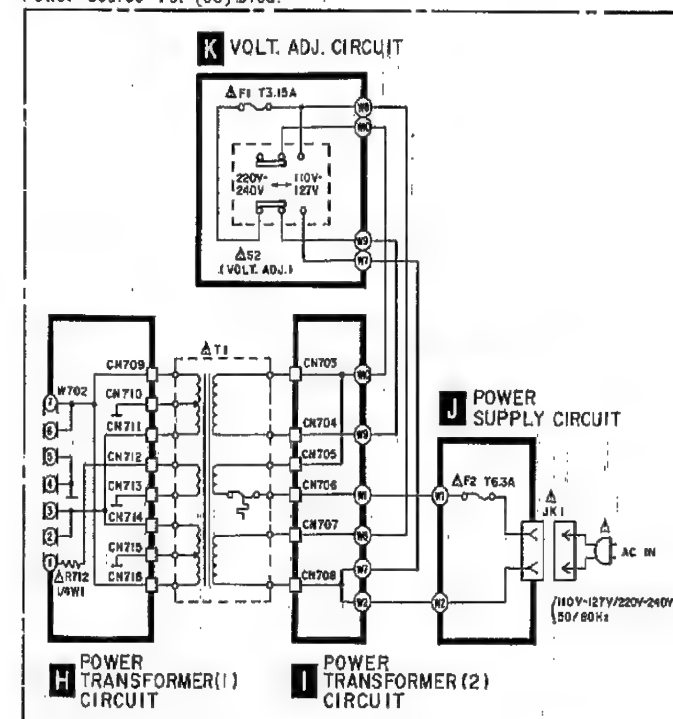

● Voltage and signal line

- : Positive voltage line.
- - - : Negative voltage line.
- : Phono signal line.
- : Recording output signal line.

Replacement Parts List

Notes: *Important safety notice:

Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

*The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indications can be used for all areas.

*Remote Control Ass'y: Supply period for three years from termination of production.

*The "(SF)" mark denotes the standard part.
